## MICROPHONE DESK STAND

### MECHANICAL SPECIFICATIONS

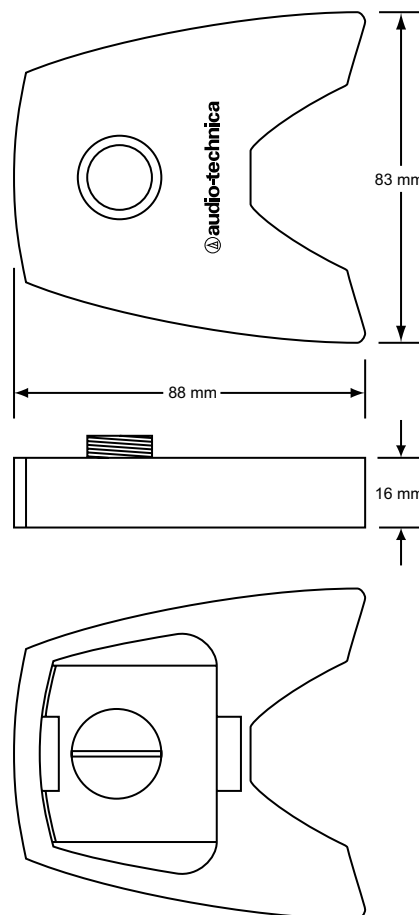

CONSTRUCTION	Butyl rubber compound
CONNECTORS	5/8"-27 threaded
DIMENSIONS	
WIDTH	83 mm
DEPTH	88 mm
HEIGHT	16 mm
WEIGHT	227 g

### DESCRIPTION

The Audio Technica Model AT8601 Microphone Desk Stand has been designed to accommodate most dynamic and condenser microphones now available. This low profile design will allow a microphone to be tilted all the way down to the desk surface to take advantage of non-multi-path pickup which provides for cleaner sound in many situations.

The AT8601 is constructed of high quality butyl rubber compound. A special steel plate molded into the base provides rigidity and proper weight distribution to prevent tipping. The butyl rubber compound also provides a functional non-slip surface. The AT8601 features a 5/8"-27 thread mount that will accept all standard microphone clamps. Ease of clamp mounting is facilitated by a large knurled knob on the bottom of the stand which is also slotted so that a coin or screwdriver can be used, if desired, to tighten the clamp.

## 桌面式话筒座

### 机械指标

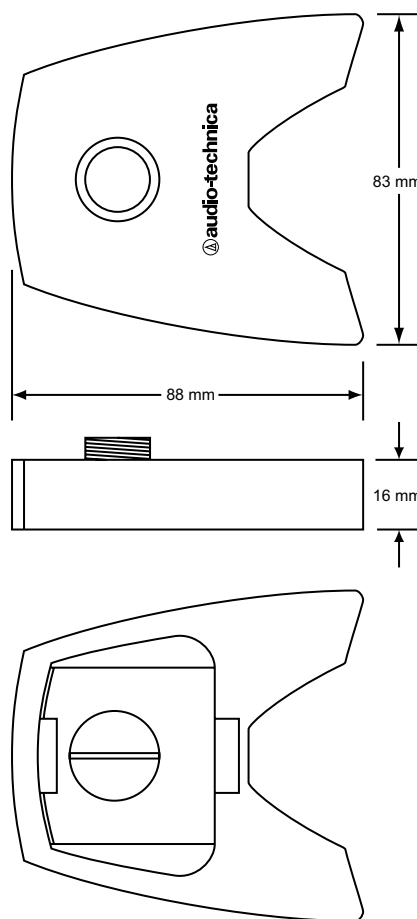

结构	丁基橡胶聚合物
连接头	5/8"-27 螺纹接头
外形尺寸	宽 - 83 mm 深 - 88 mm 高 - 16 mm
重量	227 g

### 说明

此鐵三角AT8601桌面防震话筒座，可配套於多种动圈和电容话筒使用。不显眼的短身设计，可把话筒掀动於接近桌面平面上，减少多层收音的情况，提供更清晰的收音效果。

AT8601桌面防震话筒座以高质量的丁基橡胶聚合物制造，能有效减低安装面上的撞击震动及机械噪声，而丁基橡胶聚合物并不反光的特点。内藏一块特别的钢板，提供坚硬结构和加大重量以防止打翻。AT8601话筒座可连接标准5/8"-27螺纹接头的话筒夹或鹅颈会议话筒。话筒座底部设有一枚大型螺丝，可轻易地以一枚硬币或大螺丝刀把话筒夹收紧；亦可以同样方式把话筒夹松除。
